

Artisans Verriers

| depuis 1986 |

Working with glass is our nature.

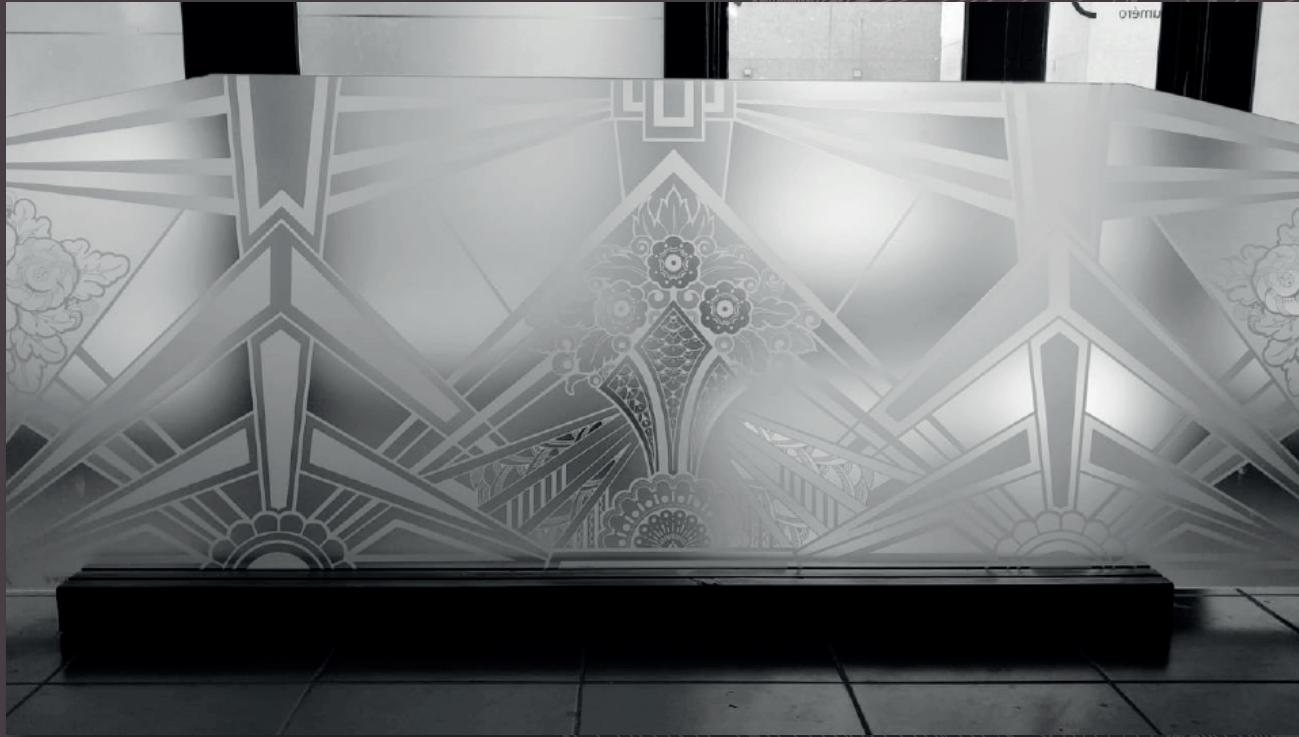

PERIOD ETCHINGS

Our craft stems from Art Nouveau and Art Deco period etchings.

Our artisan glass makers are still crafting replicas of damaged period etchings in our workshops today.

Here are some projects.

Replica of an Art Deco transom.
Paris

Replica of an Art Nouveau etching.
Ghent

Restoration and replica of the missing parts of the glass ceiling by Max Ingrand in the Villa Empain.
Brussels

CONTEMPORARY ETCHINGS

Our artisan glass makers use different etching, lacquering and gilding techniques to create contemporary designs on glass for decorative art and architecture.

Here are some projects.

श्रीं

Etching and gilding of a text in Sanskrit on a glass door separating a bedroom from a bathroom.
Ghent

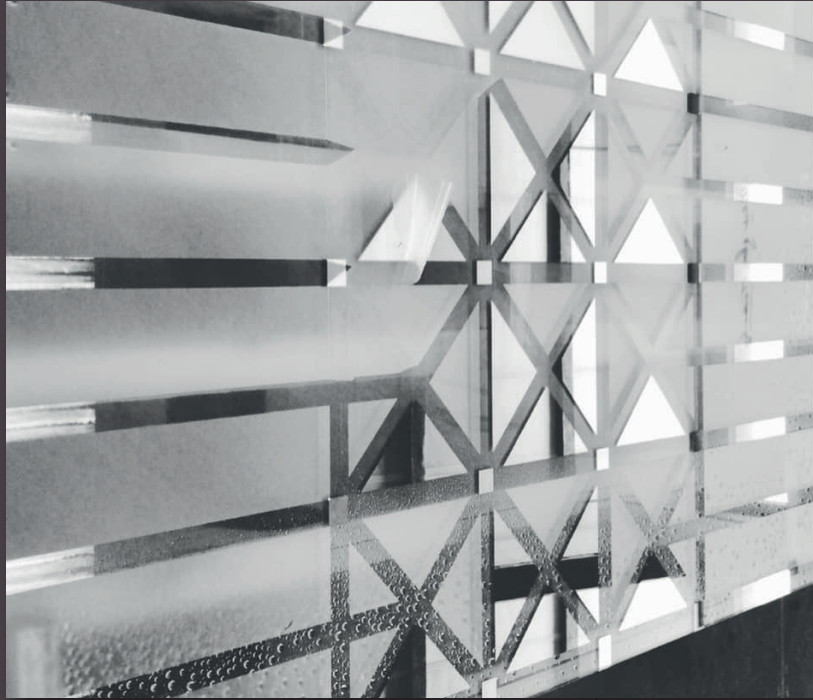

Double-sided etched and lacquered mirror for a private home.
Geneve

Bespoke frosted finish, etching and gilding.
Antwerp

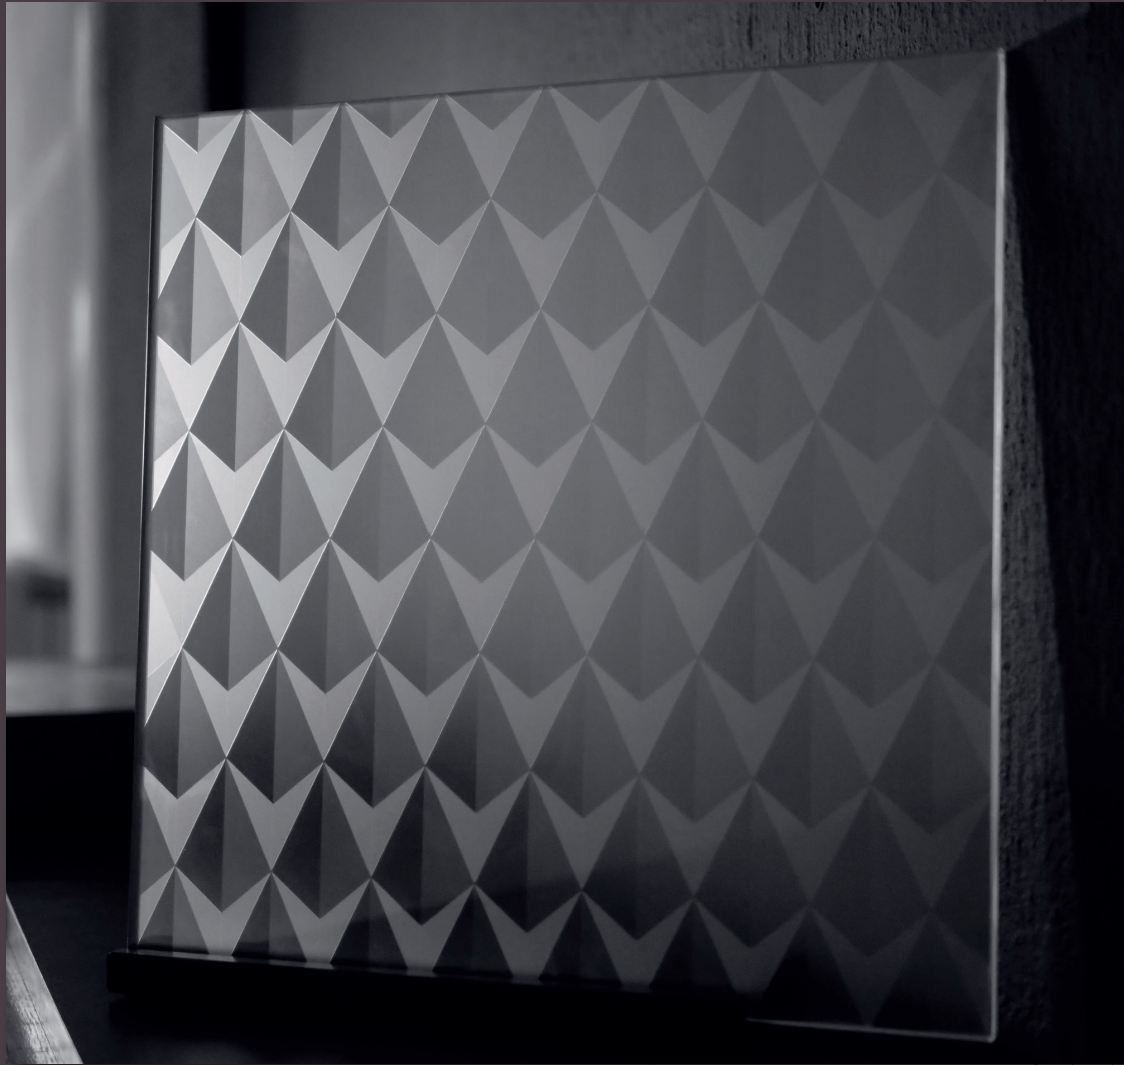

Two-tone etching for the doors and partitions of a public house.
Marseille

Bespoke mirror etching on the windows of a Place Vendôme jewellery boutique.
Paris

Wall panelling for a walk-in shower in two-tone marble-effect lacquered glass.
Brussels

Study of the project for three-tone etched and frosted extra-clear Diamant glass shower screens for a luxury hotel.
Casablanca

Etching and lacquering of ceilings and counters for the Longchamp brand.
Barcelona

OUR PROPRIETARY GLASS TREATMENTS

In recent years,
we have developed proprietary treatments
that enhance the decorative effect
of glass products.

Here are a few examples.

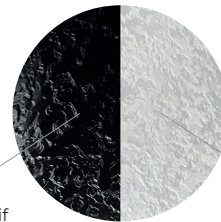

Sponging technique on glass

Inspired by the engraving techniques of the Art Nouveau period and upgraded by our artisan glass makers, Récif glass combines structure and shine for your exclusive glass projects.

Intended for glass partitions and doors or any design on flat glass...

Available on any type of glazing, as a uniform or bespoke partial treatment in matt or brilliant finish. Tempered or temperable glass.

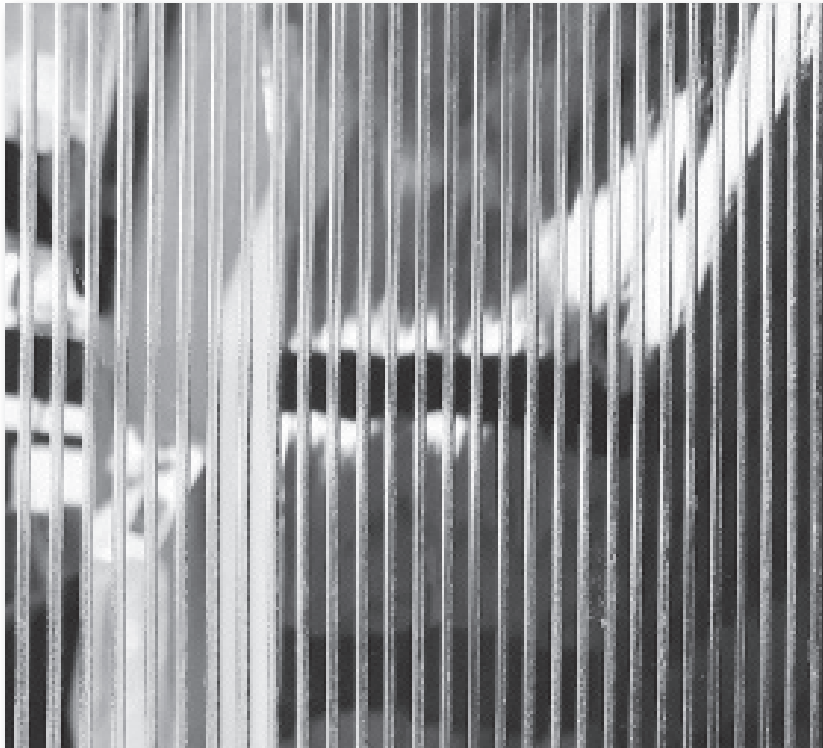

Brilliant Récif

Matt Récif

Bespoke etched and frosted glass following a pattern for interior glass doors and partitions.

Alternating frosted tones starting from the whitest to restore the transparency of glass: creation of raised areas to produce linear or floral patterns or infinite textured effects.

Deep etching on brilliant glass producing a subtle raised decorative design, while maintaining the transparency of glass.

Gradient frosted privacy treatment on a glazed surface.

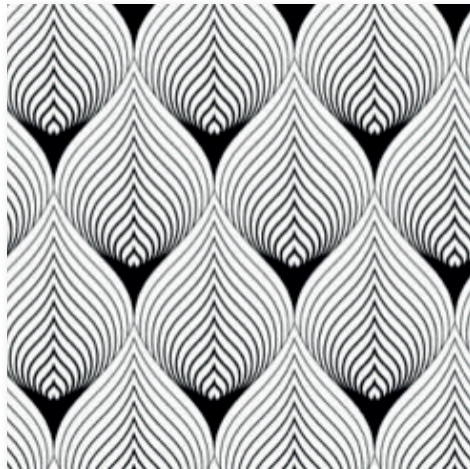

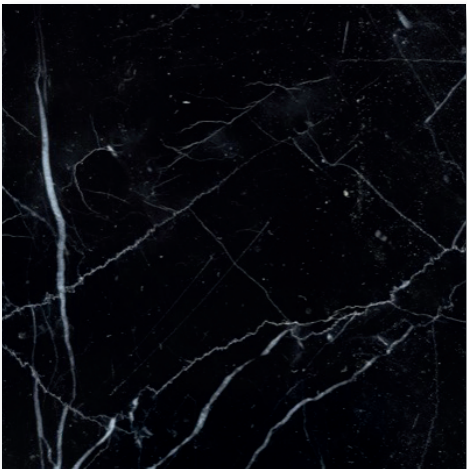

Gradient frosted shower screen from bottom to top.

«Central privacy strip» gradient frosted shower screen (gradient upwards and downwards).

Our ranges of patterns SAUVAGE, STONE, WALLPAPER...
are constantly evolving, to be used in frosted and etched glass
or colour lacquering applications.
